

EVE® comes with a range of accessories which allow you to design and redesign the lamp from one event to another.

INNLED wishes to give the creative power back to the customer by making the various templates available for any further customization : personalize the textured disk with a specific material or message, print your own motif on the paper lampshade or dare new lampshade designs with a 3D printer.

INNLED wants to promote local manufacturing but can offer access to its fablab and partners, for specific requests, and for a minimum quantity.

EVE® 3D LAMPSHADE
